

Trail King Introduces...

Advantage™

Series
APBE 1600

External Ring Pneumatic Dry Bulk Trailer Engineered To Be Light...

Mandrel bent piping provides unobstructed product flow, reduces friction, and lowers unloading temperatures.

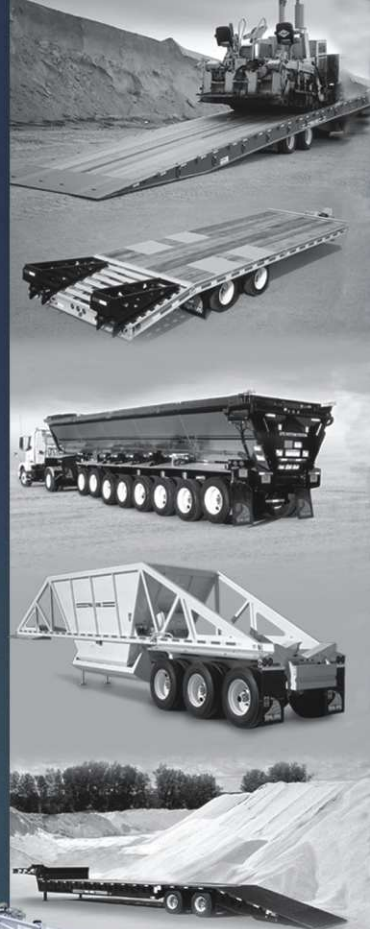

New external ring design eliminates places where product build-up occurs.

Lightweight one-piece formed aluminum support channels (front and rear) conform perfectly to the tank for optimum strength.

42-foot overall length means less weight, more maneuverability.

**Weighs Only
10,000 LBS!**

Thicker body shell, combined with external ring design, increases strength and durability.
