# Utility Trailers...

### Adjustable Hitch

To accommodate a wide variety of towing vehicles, Trail King utility trailers come with an adjustable 4-bolt hitch that is rated for the full GVWR of the trailer. Available in ball hitch or pintle hitch configurations.

### Toolbox

The toolbox (shown here with optional bolt-on, lockable cover) spans the entire width of the tongue area and is roomy enough to store all your chains and tools.

### Tie-down Brackets

Trail King includes six (6) heavy-duty tie-down brackets as standard equipment... so you can securely transport even your toughest loads. (Also pictured: optional fork holders and bolt-on spare tire carrier.)

### Break-Away System

Mounted conveniently in the front tongue area, the lighted read-out break-away system monitor provides easy and convenient monitoring of the charge status of your break-away system.

### Safety Chains

Heavy-duty safety chains are tough enough for years of dependable service, and come standard with GVWR-rated grab hooks.

### 12,000-lb. Drop Leg Jack

Standard 12,000-lb. drop leg jack features a top-mounted handle for convenient accessibility. No more scraped knuckles.

### Safety Headboard

The 4" safety headboard provides an extra dimension of safety and load-hauling security.

# Small Trailers With Big Capabilities

## Axles, Tires, Fender

Torflex axles, 8-hole wheels, radial tires, and a new rounded fender... all standard equipment... deliver a smooth ride, long service life, and attractive appearance.

## Lightweight Ramps

Standard self-supporting 60" ladder-type ramps feature a secure, easy-to-use "lock and load" ramp lock system. And, because the lock pin is attached to the ramp, it presents no obstruction to loading when the ramp is in the down position (inset photo).

Optional wood-filled ramps also available.

## Oak Deck

Trail King utility trailers are decked with 1½" nominal oak decking, not pine, and double screwed to cross members to prevent cupping. As a result, your deck will stand up to years of rugged service.

## I-Beam Cross Members

Full-width 4" steel I-beam cross members are mounted on 16" centers to provide maximum load-bearing strength. And, because the trailer is painted with 2-part polyurethane primer and paint before the decking is added, you get corrosion resistance even in places you can't see.

## Protected Electrical System

Trail King utility trailers feature rubber-mounted, shock-proof, sealed lights and rubber grommets wherever wiring runs through the frame... for longer, trouble-free, low-maintenance performance life. (Note: the license plate bracket shown in the photo also doubles as a mudflap.)

## STANDARD EQUIPMENT
