

# TRAIL KING GRAIN HOPPER

## MAXIMUM LOAD HAULING LIGHTER THAN EVER.

Trail King's durable Grain Hopper trailer has a composite smooth panel construction. It features an aerodynamic design for easy pulling and maximum load hauling capabilities. The low maintenance composite design and one-piece molded lower hoppers provide an incredibly fast clean-out that is lighter than ever, allowing you to haul more bushels.

### Popular Options

- Polished corners or match side color
- Electric tarp system with remote
- White or black lower hopper color
- Additional light packages
- Black or white panel color
- Aluminum Wheels

### NEW HOPPER DESIGN

Durable one-piece molded lower hopper design for smooth, quick clean-out with 22.5" hopper ground clearance.

### COMPOSITE PANELS

Single panel composite wall construction inside and out provides a smooth surface for incredibly fast clean-out. The impact resistant material ensures durability and long-lasting strength.

### CORROSION PROTECTION

The high-tensile steel subframe and upper coupler is painted with zinc-rich primer to prevent corrosion and extend the service life of your trailer. The design is lighter than aluminum.
